Miscellaneous Notes

Made in USA

This material was melted and manufactured in the USA. Mercury is not a normal contaminant in aluminum alloys. Neither mercury nor any of its compounds were utilized by Kaiser Aluminum in the manufacture of this material. AS9100B:2004 This material meets the requirements of (cold finished) T73 temper and QQ-A-225/9E (CANCELLED).

CERTIFICATION

Kaiser Aluminum & Chemical Corporation ("Kaiser") hereby certifies that the metal shipped under this order has been inspected and tested and found in conformance with the applicable specifications forming a part of the description set forth in Kaiser's sales acknowledgement form. Any warranty is limited to that shown on Kaiser's general terms and conditions of sale. Test reports are on file, subject to examination.

LABORATORY MANAGER

TRANSPORT AND STORAGE CONDITIONS OF ALUMINUM STRIPS AND SHEETS BY CUSTOMER
Strip (sheet) should be transported by covered, dry and clean means of transport (preferably closed trailer), protecting it from mechanical damage, humidity and harmful environmental factors.
Strip (sheet) should be stored in covered, dry and clean rooms protecting them from humidity and action of active chemicals. Protection of coil edges against mechanical damage should be taken into special attention. Rolling/fold damage can cause difficulties in recycling process.
The storage temperature room should be stable. Changes of the temperature in stock cause that of moisture is condensed on the strip surface, in consequence of capillary activity, between coils, between coils and inducing corrosion.
Disregard of above mentioned transport and storage conditions absolve supplier from responsibility for material quality.
